

# Feed Component Guide

## for Canon Office Equipment

This guide is designed to help you order high quality, cost-effective Katun feed components for the Canon office equipment listed below. You can identify the correct Katun part number for a particular feed component in either of two ways:

1. Cross-reference Katun part numbers with the OEM part number for a given feed component.
2. Locate the feed component in the appropriate machine illustration and then reference its identification letter in the product listing.

## Installing Katun Feed Tires? Proper Installation Ensures Excellent Performance

Every "crepe-style" (textured surface) Katun feed tire is imprinted with a directional arrow. When installing, it is essential that the imprinted arrow points in the direction of required tire rotation. In certain machine applications, this may mean that the side for the tire that bears the imprinted arrow faces toward the technician; in other applications, the arrow side may face toward the rear of the machine.

## Feed Component Care Tips

- *Keep bags sealed tightly until feed components will be installed.*
- *Store feed components in a cool, dry, and dark location.*
- *Clean feed components ONLY with soap and warm water.*
