

CONVENIENT, INTUITIVE & SIMPLE OFFLINE STAPLING

THE INSTANT STAPLER

“

High performing stapling capability, quick stapling speed and a compact size to seamlessly integrate in your office & document environment.

”

Canon presents the **Instant Stapler**, manufactured by MAX Co. Ltd for the entire office portfolio.

The **Instant Stapler** can be used to re-staple documents that have been separated prior to copying, scanning or sending a job. This is all achieved offline with options to staple corners, sides and double stapling.

The **Instant Stapler** will enhance the office workflow with its high-performance stapling and increase productivity due to its high staple volume of up to 50 sheets. This allows office users to save time, effort and contact with surfaces, supporting hybrid working and accelerating digital transformation.

It will perfectly compliment your existing device with its light colour & sleek design.

Canon

KEY FEATURES & BENEFITS

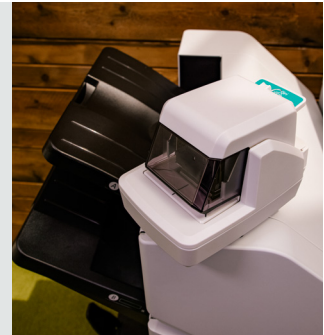

High Stapling Capability

The Instant Stapler is capable of stapling up to 50 sheets in just 0.5 seconds – quick and easy!

No Installation & Stability

The Instant Stapler can be placed on any surface or device with its strong, double-stick back and hassle-free installation.

Easy Maintenance of Refills

With a 5,000-staple cartridge refill, users can staple for longer, saving interruptions to the workflow and increasing productivity.

Versatile Stapling Options

Fast, offline stapling options for offices without staple finisher devices. Corner, side and double stapling as you like.
