Epson **Document Capture Pro**
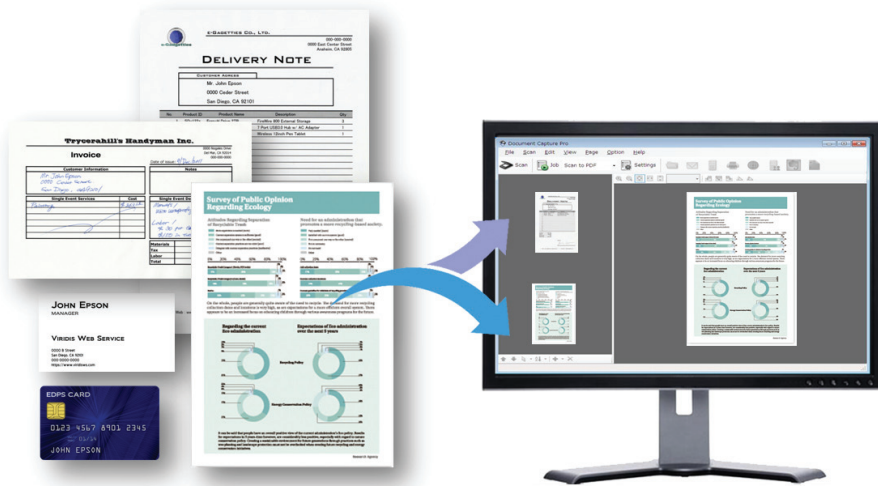

Businesses of all sizes are finding now, more than ever before, that Document Management Systems (DMS) are the best way to integrate paper documents into their workflow. To help boost businesses' productivity, Epson is offering its own software package for free download from its website.

Document Capture Pro is compatible with all common Document Management Systems and cloud storage repositories, opening up a world of possibilities for businesses who need to digitise paper documents.

It can be used in a number of different ways with Epson's business scanners: with the Workforce DS-30 mobile scanner for handling sales enquiries, contracts or order forms in the field or on customers' sites, or with the GT-S55 and GT-S85 high-performance scanners for fast management of multiple pages and large batches of paper.

Users don't need any special training to get started, as Document Capture Pro has an intuitive interface which is quick to master. For ease-of-use it also has advanced document imaging features and supports all common file formats, including BMP, JPEG, TIFF, PDF, searchable PDF and PDF/A.

The versatile Document Capture Pro suits everyone from the beginner to the advanced user. Do more than just scan with it, as it offers many 'scan-to' functions, including scan-to-cloud, scan-to-FTP and scan-to-SharePoint alongside the ability to handle batch separation, barcode recognition and zonal OCR-A and OCR-B support. And, as Epson offers its partners a Self Developer Kit, users can benefit from their ability to add plug-ins to DMS or cloud services to suit almost any business.

KEY FEATURES

- Boost productivity at no extra cost
- Seamlessly integrates into almost all Document Management Systems and cloud services
- Compatible with Epson business scanners DS-30, GT-S55 and GT-S85
- Intuitive user interface
- Jobs Profiles registration
